ATDC Team Values 2025

In February 2025, the ATDC team attended a workshop to co-design our team values. Together we identified the following five values as central to informing how we work together. We recognise the importance of shared values and a positive workplace culture. We commit to keeping our values central in our daily work.

We are Skilful

We share our knowledge and continue to develop our evidence-informed expertise. We seek to share our diverse skill sets and collaborate to drive progressive change.

We have Integrity

We act with honesty and transparency. We ensure that our work is ethical, and we are accountable.

We are Adaptable

We are positive and flexible in our approach to our work. We listen, reflect on our practice, and remain open-minded, embracing curiosity and innovation.

We are Kind

We treat ourselves, and others with compassion, respect and fairness. We seek to be clear and open in our communication.

We are Authentic

We are our authentic selves and welcome and encourage the same in others. We embrace diversity and recognise the strength it brings to our team.
